PROJECTS

Hostel Mart – Online Hostel Store | Live

Jul 2026 - Aug 2026

- Architected a full-stack e-commerce platform for hostel essentials using React/Node.js/MongoDB — swap in your actual stack, supporting 50+ product listings across multiple categories with real-time inventory tracking.
- Engineered a secure checkout and order-management workflow handling 20+ orders per cycle, including cart persistence, providing cod and order status tracking.
- Implemented role-based access control across 2 user roles (students and admins), enforcing permissions on 15+ vendor/product-management routes and centralizing order history in a single dashboard.
- Tech Stack:** MongoDB, Express.js, React.js, Node.js, Tailwind CSS

Voice Ai Agent

Jun 2026 - Aug 2026

- Architected a voice-controlled AI agent capable of executing local PC operations (file management, app launches, system commands) via natural language, supporting both online and fully offline inference modes.
- Integrated offline speech-to-text and local LLM inference into a unified voice-command pipeline, enabling the Voice AI Agent to execute PC operations without requiring an active internet connection.
- Validated the offline-first execution engine across multiple system commands and network conditions, confirming consistent PC-control accuracy whether or not an internet connection was available.
- Tech Stack:** Python, Vosk, Whisper.cpp, Ollama, Llama 3.2, PyAutoGUI, psutil, Piper TTS, Porcupine
